Project Idea

For the ENSE 400/477 terms we are hoping to build a platform fighting game that utilizes the best ideas from the genre and adds new idea to expand it farther.

For this project we are ultimately trying to learn and expand our knowledge of game design. By the end we hope to have the knowledge to be able to maybe continue with this project or be able to delve into other projects involving game design.

Group reflection

- Do you feel you are on track?
 - I think we are satisfied with our progress
- Do you feel there are barriers to your success (if any)?
 - I think for the most part we are ok right now
 - We are heading into blueprinting so we might hit some difficulties there
